WORK EXPERIENCE

Resume Screening

- Developed an AI-powered Resume Screening System to automate candidate shortlisting.
- Matched candidate skills with job descriptions to calculate relevance scores
- Implemented keyword-based and skill-based resume ranking.
- Used Python, Flask, HTML, CSS, JavaScript, and SQLite/MySQL for development.

Hospital Managment System

- Developed a Hospital Management System to streamline hospital operations and patient management.
- Designed a secure database to store patient, doctor, and billing records.
- Integrated CRUD (Create, Read, Update, Delete) operations for efficient data management.

Drug Authentication System

- Developed a Drug Authentication System to verify the authenticity of medicines and detect counterfeit products.
- Developed a user-friendly interface for quick and secure medicine authentication.
- Built modules for manufacturer registration, drug management, and user verification.

Employee Managment System

- Developed an Employee Management System to simplify employee record management.
- Developed role-based access for administrators and employees.

Volunteer

- Volunteered as a Technical Team Member for Smart India Hackathon (SIH) 2025, providing technical support and ensuring the smooth execution of the event.
